INTRODUCTION

CORRECTLY designed office chairs have dignity and character, as well as durability, when properly made of suitable wood. The very nature, texture and figure of true cabinet woods are particularly adaptable for a wide range of permanent, beautiful and lasting finishes that are impossible to duplicate on metal. There is no more complete admission of the superiority of wood than the attempts made to paint and finish metal to match it.

No satisfactory substitute for wood has been found in desk or chair construction. Specially designed and highly decorative hand carved effects are possible in wood at a minimum of expense.

Wood is a non-conductor of both heat and electricity, whereas a metal desk or chair is a natural conductor of heat and subject to disagreeable shocks of static electricity. Where metal constantly comes in contact with the body it is apt to be injurious to health.

Wood is naturally elastic and absorbs and recovers from impacts that with metal would be destructive. The present gauge of metal used in chair construction, to lessen a chair's weight, is liable to become distorted and take a permanent set. Actual fire tests on metal chairs prove they become plastic under sufficient heat and readily collapse by their own weight, whereas wood chairs are slow to ignite under the same heat condition, and quite often are only charred and can be readily refinished.

The essence of correct posture seating is only obtainable in correctly designed and form fitting business chairs that brace the human body in the proper position and are made of wood.

In presenting this catalog we display, through process color printing, a number of our latest designed chairs, that will harmonize with appropriate furniture.

All Marble & Shattuck chairs are "Designed for comfort and built to last."

The catalog illustrations of installations made by M & S dealers, and partial list of users is sufficient evidence of the diversity of business standardized on Marble & Shattuck chairs. Many of our chairs have seen forty-five years of uninterrupted service without repair, and are still giving satisfaction, which speaks well for economy in the use of wood chairs.

Our TRADE MARK on chairs is a guarantee of honesty and sound value.

It is chiefly by its beauty and finish that wood attracts, which no artificial grained effects on metal chairs can duplicate.

19 inch spider
Base No. 33-L

The above chairs of Louis XVI design are the essence of refinement and combine richness with distinctive style. They are particularly appropriate for use in the more formal executive office. Especially when made in walnut, as this was the popular wood of that period.

This well known design shows plainly the Dutch influence, which is a distinctive feature of the Queen Anne Period. It is undoubtedly the earliest example of the use of the cabriole leg in chair construction. Old as the original of this chair is, it still stands as a model for all that is desirable in design and construction.

Queen Anne chairs have been popular in the United States since early Colonial Days, and the Period is readily recognized by the characteristic cabriole leg, which was anciently used in China and Egypt and was brought to England by the Dutch Traders; the cockle-shell carving showing on the leg being a favorite and distinctive ornament.

Cast brass flanged shoe for square tapered front legs.

Unless shown with the chairs, the above accessories are special, and carry an extra charge as shown in the Price List. When ordering give pattern number of chair for which equipment is desired.

No. S-1462

Special Tables constructed for clubs and hotels throughout the country.

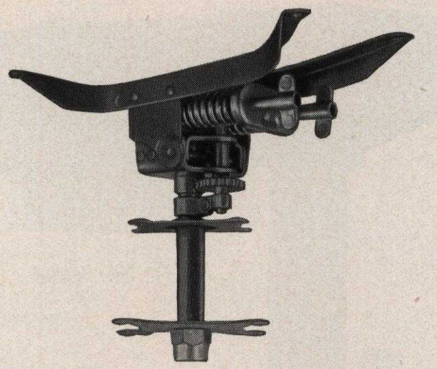
We are prepared to design and construct special chairs and tables for Clubs, Hotels, Steamships, Banks, Lodges, and Public Buildings.

We cordially invite correspondence from architects.

No. S-1865

No. S-1795

No. S-1746



M&S No. 596 Mechanism

Perpetually lubricated bottom ball bearing.

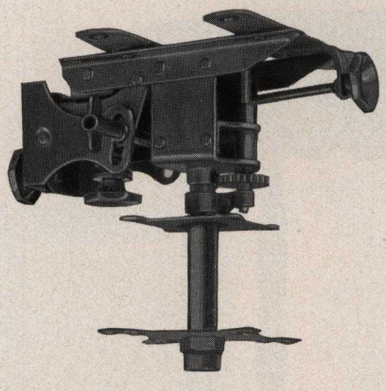
Made in 14½ inch, 16¼ inch and 19 inch spider lengths from screw hole centers.

All swivel mechanisms used on M&S chairs are guaranteed against breakage. They are made of cold stamped steel stampings and with solid cold rolled shafts. (No castings to break.)

No. 396 Mechanism

Non Ball Bearing Action. 14½ inch spider length from screw hole centers.

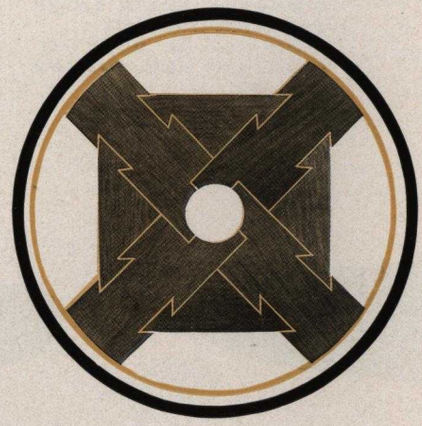
Made of cold stamped steel stampings.



M&S No. 622 Mechanism

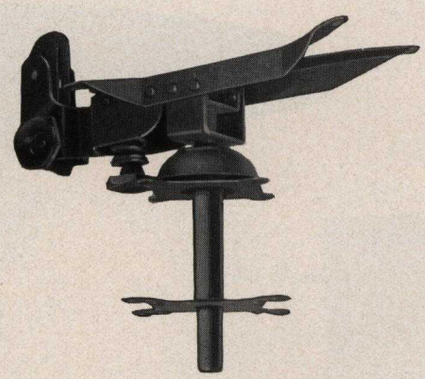
Perpetually lubricated bottom ball bearing.

Patented for use on M&S Ad-Jus-To-Form chairs.



Section showing "Guaranteed" all wood base construction.

Notice how the base legs and corner blocks are interlocked. The steel top plate is fastened with four, and the bottom plate with eight 14 gauge, 1¼ inch screws. (Patented).



No. 475 Mechanism

Non Ball Bearing. Used on the single post Ad-Jus-To-Back Clerical chairs.

Information About Finishes and Leathers

This same finish on Birch chairs is our No. 5 finish. Code — *Jute.*

WALNUT — No. 46 — a varnish finish of medium brown color, to match that of leading desk manufacturers. Code— *Kaiser.*

This same finish on Birch chairs is our No. 2 finish. Code — *Keel.*

Green Stain Finishes to Match Steel Desks

M. & S. Green Stain on Oak is a glazed finish over a non-fading pigment stain. The following are colors which match the colors of various manufacturers.

M. & S. No. 50 — The Macey Co.; Art Metal; Jamestown Metal Desk; Yawman & Erbe and Watson Mfg. Co. Code — *Kelp.*

M. & S. No. 51 — General Fireproofing; Berger Mfg. Co. and Metal Office Furniture Co. Code — *Kennel.*

M. & S. No. 52 — Shaw Walker; Corry-Jamestown and Canton Art Metal. Code — *Keno.*

M. & S. No. 53 — Globe Wernicke. Code — *Khaki.*

Leathers

All upholstered chairs are supplied in various colors of No. 1 Machine Buff, Top Grain, Veal Skin finish on Top Grain and Genuine Veal Skin leathers, all of No. 1 selection and quality, and priced in our list accordingly.

There is an additional charge for upholstering chairs in other than our stock leathers.

Where color is not specified on order and in absence of any separate understanding—we supply a No. 1 Machine Buffed grade of leather in the following colors:

For Golden Oak	**Brown M. B. — M. & S. No. 333**
For Mahogany	**Olive Green M. B. — M. & S. No. 331**
For Walnut	**Blue M. B. — M. & S. No. 326**
For Green Stain Finishes	**Olive Green M. B. — M. & S. No. 331**

FURNITURE FOR OFFICES, BANKS, SCHOOLS LIBRARIES, PUBLIC BUILDINGS

WESCOEVILLE, PENNSYLVANIA
SUBURB OF ALLENTOWN

April 8, 1937

Mr. Charles M. Tally, Architect
314 W. Broad St.,
Telford, Pa.

Dear Mr. Tally:

As promised you am pleased to forward in envelope attached complete Catalog with Supplement covering 'Marble & Shattuck Chairs which Line need no introduction as same is used for the better and finer installations the Country over - for the past 50 years.

Also note the Catalog covering 'Tell City Chairs' for the School. This Concern is known as the pionier in this line of work having been in business since 1865.

The Catalog of 'Hoosier Desks' should also prove interesting which Line has been used by leading Dealers everywhere for many years.

The Catalog Folder 29 covering 'Samson Tables' must suffice until the new general Catalog is ready for distribution within 60 days. This si the only Concern, manufacturing Tables exclusively, left in the Country, having been in business continuously since 1896.

Might mention that several of these Lines have been used by Dealers on some of your jobs to the entire satisfaction of the owners. And all of the Lines were used in the Masonic Temple, Allentown and other notable installations such as the Court Houses in Norristown, Reading, Pottsville etc.

Please do not hesitate to call on me at any time for information.

Respectfully yours,

HENRY L. GUTH
